How Does It Work?

1. Before class (15mins)

The teacher will assign a pre-class assignment with relevant questions for students to prepare for the class. Students are able to come to class prepared to fully participate and get their best from the lesson.

2. During class (90mins)

Small groups of 8-10 students collaborate via video call with their teacher. They outline objectives and goals, discuss the questions and task(s) from the pre-class assignment, review any questions and set up the post-class collaborative activity as well as the pre-class assignment for the next day.

Students should be prepared for a much more intensive class than a normal face-to-face session!

3. After class (30mins)

Students are asked to work on a writing or speaking post-class collaborative activity, which they upload on Teams. Each assignment has clear success criteria to help students self-evaluate, set their own goals and see their progress. They discuss virtually with their group and the teacher monitors the chat.
