How Does It Work?

1. Before class (15mins)

The teacher will set up a pre-class assignment with relevant questions for students to prepare for the class. This can be anything from reading or listening from the course book, a relevant video or article, or a Flashpoint from EC Online. Students are able to come to class prepared to fully participate and get their best from the lesson.

2. During class (90mins)

Small groups of 8-10 students from around the world collaborate via video call with their teacher. They outline objectives and goals, discuss the questions and task(s) from the pre-class assignment, review any questions and set up the post-class collaborative activity as well as the pre-class assignment for the next day.

Students should be prepared for a much more intensive class than a normal face-to-face session!

3. After class (30mins)

Students are asked to work on a writing or speaking post-class collaborative activity, which they upload on Teams. Each assignment has clear success criteria to help students self-evaluate, set their own goals and see their progress. They discuss virtually with their group and the teacher monitors the chat.

*Level Progression

At EC our progress guarantee - based empirically on our understanding of learner language acquisition ability - shows that students who study 20 or more hours a week, attend all their classes, and engage and commit to their learning will progress one EC level every 10-15 weeks.

We also recognise that each student is individual. This means we also operate a dynamic progression system - integrating ongoing live assessment combined with formal testing. This allows flexibility for those students who are making good progress to move up at a faster rate, to continue to be pushed and challenged.
